PROFILE

Second-year Computer Science student at Robert Gordon University with hands-on experience in data analytics, UI/UX prototyping, and full-stack web development. Proficient in Power BI, Figma, and the MERN stack, and holder of industry-recognised certifications from Deloitte and HP LIFE. Actively seeking a internship placement in data analytics, full-stack development, or a related technology role. Eager to apply academic learning to real-world projects and gain industry experience that bridges technical skills with practical impact.

TECHNICAL SKILLS

Data & Analytics	Power BI, Data Visualisation, Data Cleaning, Exploratory Data Analysis, Excel
Web Development	MongoDB, Express.js, React.js, Node.js (MERN), HTML, CSS, JavaScript
Design & Prototyping	Figma, Wireframing, User Flows, High-Fidelity Prototyping, UX Research
Programming	JavaScript, Python (basic), SQL
Tools & Platforms	Git, GitHub, VS Code, Postman, MongoDB Atlas

EDUCATION

BSc (Hons) Computer Science

2024 – Present

Robert Gordon University (RGU), Aberdeen

- Currently in Second Year of study
- Relevant modules: Data Analytics, Software Engineering, Web Development, Database Systems

PROJECTS & UNIVERSITY ASSESSMENTS

Junior Data Analyst – University Data Analytics Assessment

- Performed data cleaning, transformation, and exploratory data analysis on structured datasets
- Designed and developed interactive Power BI dashboards to visualise key business metrics
- Presented analytical findings and data-driven insights to academic assessors
- Applied data storytelling techniques to communicate trends clearly to non-technical audiences

UI/UX Prototype – KLT Group

- Collaborated in a team to design a high-fidelity prototype for the KLT Group client brief using Figma
- Conducted user research and created wireframes, user flows, and interactive mockups
- Applied UX principles including accessibility, usability, and human-centred design
- Presented the prototype to academic staff, achieving a B grade

Full Stack Web Application – MERN Stack

- Developed a full-stack web application using MongoDB, Express.js, React.js, and Node.js (MERN)
- Implemented MongoDB as the database layer with server-side authentication and JWT-based session management
- Built RESTful API endpoints and a responsive React frontend with component-based architecture
- Applied secure authentication best practices including password hashing and protected routes

CERTIFICATIONS

Deloitte Australia – Data Analytics Job Simulation

Issued May 2026

Forage

- Completed a virtual internship simulation covering data analysis, data interpretation, and presenting insights
- Credential ID: LMaavSq6F3grveoQN

Data Science & Analytics

Issued May 2026

HP LIFE

- Completed HP LIFE online certification covering data science methodologies and analytics techniques
- Credential ID: 4a085624-3ae7-42c5-939e-99337105d76d

SOFT SKILLS

Team Collaboration

During the KLT Group project, I collaborated effectively within a team environment, contributing to the design of the high-fidelity prototype and advising on feature prioritisation. I developed a strong sense of trust with my teammates, supporting one another when challenges arose and ensuring the project progressed smoothly toward delivery.

Communication

I presented my Power BI findings to academic assessors, an experience that highlighted the importance of clear data storytelling to non-technical audiences. Recognising areas for improvement, I proactively sought feedback from classmates and my module coordinator, using their input to refine both my presentation delivery and the clarity of my insights.

Problem Solving

I encountered authentication bugs in my MERN stack application and duplicate data issues within my data analysis project. In both cases, I systematically diagnosed the root cause and implemented appropriate fixes — resolving JWT session handling in the web app and cleaning the dataset to ensure accurate trend analysis. The data analysis project achieved a passing grade, validating the effectiveness of my approach.

Time Management

For the KLT Group presentation, our team faced a strict five-minute time limit. I helped coordinate our rehearsal schedule, ensuring we practised repeatedly to keep within the constraint without sacrificing content quality. This disciplined approach allowed us to deliver a polished, well-timed presentation on the day.

PERSONAL INTERESTS

cricket, cooking , running.
